

Ewa Bednarska

I work for **Makin Metal Powders** based in Rochdale, near Manchester in The United Kingdom. Makin Metal Powders is part of the United States Bronze Powders group of companies and is one of the leading non-ferrous powder producers in Europe. The company has been established for over 50 years supplying into industrial, automotive, electronic and aerospace industries worldwide.

I am a Chemical Engineer with a Polish background and in the past I was involved in developing formulations for new products and modifications e.g. materials for industrial floors which consisted of epoxy resin, amine curing agent and mineral fillers, chemically resistant and hydrophobic materials used in the building industry. Moreover I developed formulations for anaerobic adhesive joints which are extremely difficult to disassemble at high temperature and I worked on modifications to Composite Polymers and Coating materials for reconditioning, surface protection and repairing parts of industrial machines.
