Studies

- 2004 / present** **Universidad Politécnica de Valencia**
PhD in mechanical and materials engineering
- 2002/2003** **Institut National Polytechnique de Lorraine (INPL)**
École Nationale Supérieure en Génie des Systèmes Industriels
Master in innovation management
- 1997/2002** **Moscow State Institute of Steel and Alloys (Technological University)**
Faculty of Non-Ferrous and Precious Metals
Engineer in metallurgy and material science

Professional skills

- April-December 2003** Laguna II's **Conformity Monitory Plan improvement** in the factory of Sandouville, **Technocentre RENAULT** (as **grant holder** – Advanced Studies Diploma)
- 2001-2002** **Taking part in new technology development** for treating anode's waste coming from aluminum refinement, research's laboratory belonging to light metals service (combining with engineering studies)
- July 1999** **Grant holder** in the aluminum factory of Bratsk (Russia)
- July 1998** **Grant holder** in the aluminum factory of Zaporojié (Ukraine)

Various

- February 2003** **2nd prize in competition « Des Synergiades » (free innovation competition)** from Meurthe-et-Moselle region (France).
Project concerning colored roof windows manufacturing.
- April 2004** Patent: **Colored rooflight has four parallel panes of glass forming chambers that can be filled with colored fluid**
FR20020013488 20021029
- July 2004** Patent **Method for extracting of gallium from sludge in aluminum production** N° of appliance: RU20010130385
20011113
- Hobbies** Classical music (piano's diploma in the piano's music school in Moscow), drawing, dancing, volleyball, swimming
