Author Index

Berglund, T, Dalarna University, TAF/SinterHeat, “High Velocity Compaction of High Speed Steel Powder - Possibilities and Constraints”, Vol.3, p.21

Bidaux, J-E, University of Applied Sciences of W Switzerland, “Metal Injection Molding of NiTi Shape Memory Alloys”, Vol.2, p.223

Blais, C, Université Laval - Génie Métallurgie Matériaux, “Characterization Of Different Lubrication Approaches To Improve Green Machinability”, Vol.3, p.395

Bodrova, L, Ternopil State Ivan Pu'l'uj Technical University, “Microstructure of Polycarbide Based Hard Alloys”, Vol.1, p.203

Bozzolo, N, LETAM - UMR CNRS, “Processing and Characterisation of Cu / Cr2Nb Composite Powders Obtained by Gas Atomisation”, Vol.2, p.15

Carreno-Morelli, E, Univ. of Applied Sciences of Western Switzerland, “Development of Pressure Sensors by Powder Technology”, Vol.1, p.393

Casagrande, A, University of Bologna, “Microstructures of NiAl to Titanium and NiAl to Carbon Steel Joints Obtained by Microwave Assisted SHS”, Vol.3, p.157

Casari, F, University of Trento, “Spark Plasma Sintering Of Aluminum Powder And Turning Chips To Produce Metal Foams”, Vol.3, p.163

Hartwig, T., Fraunhofer-IFAM, "2C-molding for MIM", Vol.2, p.197
Hebda, M., Cracow University of Technology, "Bainitic-Austenitic Dual Phase Sintered Steels Containing Silicon", Vol.1, p.21
Hebda, M., Cracow University of Technology, "Influence of Compaction Pressures on the Mechanical Properties of Infiltrated Sintered Austentic Stainless Steel AISI 316L", Vol.1, p.79
Herranz, G., Universidad de Castilla La Mancha, "Rheological Properties of M2 HSS Feedstock Designed for Metal Injection Moulding", Vol.2, p.183
Huang, S., KU Leuven, "Pulsed Electric Current Sintering of WC Based Hardmetals and ZrO2 Based Ceramic Composites", Vol.1, p.257
Ivanus, R.C., University of Craiova/Faculty of Mechanics, "Copper Powder of Controlled Morphology and Particle Size by Biochemical Method", Vol.2, p.51
Ivanus, R.C., University of Craiova/Faculty of Mechanics, "Thermochemical Treatments Applied to PM Ferrous Materials", Vol.3, p.429
Juhani, K., Tallinn University of Technology, "Influence of Sinter/HIP Sintering on Properties of Chromium Carbide Based Cerments", Vol.1, p.209
Kalkanli, A., Middle East Technical University, "Development of Hot Extruded AlFeViSi alloy for High Temperature Application", Vol.2, p.277
Okrosashvili, M., Georgian Technical University, “Nanosized Metal Powders Produced by Electron-Beam Technology”, Vol.2, p.289
Pascu, C-I, University of Craiova, Faculty of Mechanics, “Study on the Quality of the Composite Based on Tungsten Powder After Hydrogen Sintering”, Vol.1, p.353
Povarova, K, Baikov Institute of Metallurgy and Materials Scien, “Preparing of Tungsten Heavy Alloy from Nanopowders Synthesized by the Chemical-Metallurgical Method”, Vol.2, p.301
Radu, S, University of Craiova, “Research to Obtain Wear Resistant Parts Made of Recovered Powders”, Vol.1, p.359
Raharijaona, J J, Laboratory SIMAP, “Effect of Oxygen Content during Sintering of Tungsten/Copper Powder Mixtures”, Vol.3, p.143
Rodriguez-Baracaldo, R, Polytechnic University of Catalonia, “Mechanical Properties of Nanostructured and Ultrafine Grained Steel”, Vol.2, p.265
Sauermann, I, RWTH Aachen University, “Density Dependence of Rolling-Contact Fatigue of Case-Hardened PM Steels With and Without Nickel”, Vol.1, p.115
Savich, V, PM Institute, “Peculiarities of Construction of a Porous Structure of Implants from Titanium Powder for Replacement of Bone Defects”, Vol.1, p.399
Vieira, MM, Polytechnic Inst of Leiria, School of Techn. & Man, “Production of Apatite-type Oxide Ion Conductors La9.33Si6O26 and La9.33Si2Ge4O26 by Mechanical Alloying”, Vol.2, p.71
Wisniewska-Weinert, H, Metal Forming Institute, “Nanostructuring Approach to Produce PM - Parts with Improved Tribological Properties”, Vol.2, p.253
Wu, C, University of Birmingham, “Experimental Study of Die filling using Positron Emission Particle Tracking”, Vol.3, p.335
Zendron, M, Universita Degli Studi di Trento, “Effect of Composition and Pressure of the Backfilling Gas on Vacuum Sintering of Manganese Alloid Steels”, Vol.1, p.15
