EPMA Membership Services

- **Developing** the PM Future
- **Promoting** PM Technology
- **Representing** the European PM Industry

www.epma.com/membership
EPMA Membership Benefits
10 Reasons to join the EPMA

**Market Knowledge**
Enhance your market knowledge through access to unique industry information using our range of powder metal PM statistics, presentations and papers.

**Product Development**
Improve your product development through access to EU and EPMA Member initiated R&D programmes.

**Save Money**
Save money by receiving substantial discounts on attending and exhibiting at the leading annual Euro PM Congress and Exhibition and our series of training courses and seminars.

**Health & Safety**
Obtain unique international access on key issues such as REACH, ISO standards and health and safety legislation.

**Free Advertising**
Promote your sales through free advertising via an entry in the EPMA Members Directory on one of the world’s most visited PM websites.

**News Updates**
Keep updated on industry news and developments through the Email News service and the EPMA newsletter – both free to EPMA Members.

**Networking**
Develop your high-level networking opportunities through EPMA Sectoral Groups, training seminars and the general assembly.

**Keep Compliant**

**Member Only Content**
Access Member only content from a range of sources via the EPMA website Members Area.

**Support Promotion**
Develop the market for your products by supporting promotion of PM technology via exhibitions and web-based information.

www.epma.com/membership
About Us

The European Powder Metallurgy Association (EPMA) is a leading European Powder Metallurgy (PM) Trade Association with over 200 corporate members from 30 countries, covering micro-companies to multinationals.

Here is how EPMA Membership could be beneficial to your organisation:

Congress and Exhibitions

EPMA organises the leading PM related technical congress in Europe, the annual Euro PM Congress and Exhibition and, every six years, the World PM Congress and Exhibition. The technical sessions cover a wide range of subjects from specialist topics such as New Materials, Processes and Applications to more general themes, via a rigorous peer reviewed system.

Training and Education

A key element of EPMA’s role is the development of educational and training materials, such as the organisation and implementation of a range of PM Training Courses, covering all aspects and sectors of the PM industry. A full list of all the training and educational seminars taking place in 2020, including the annual residential PM Summer School that provides young scientists and engineers the opportunity to meet some of the leading experts in the industry, can be found on the back page.

Member Discounts

Members receive substantial discounts on congress and seminar fees, exhibition space and publications. Additional EPMA Member discounts can be found online at: www.epma.com/membership

Industry News

All members receive our Email News that helps keep them up-to-date with what is happening across the European PM industry and related sectors. The regular EPMA Newsletter also covers Industry News, PM Trends and the latest EPMA activities.

Networking Opportunities

The EPMA offers a unique opportunity for networking within the Additive Manufacturing, Functional Materials, Hard Materials, Hot Isostatic Pressing, Metal Injection Moulding and Structural Parts communities. Members are represented by six sectoral and four working groups who have regular meetings and updates on their areas of interest. They are an important part in defining the policies of the EPMA, as well as enabling companies throughout the supply chain to work together.

Industry Promotion

The EPMA actively promotes the benefits of using PM technology to End User target markets through attendance at selected trade shows, seminars and workshops. These activities are combined with the distribution of key PM reference sources such as ‘Introduction to’ series, which covers Additive Manufacturing (AM), Hot Isostatic Pressing (HIP), Metal Injection Moulding (MIM) and Press and Sinter (P&S). The EPMA website is a world-leading source of PM information with EPMA Members benefiting from exposure from detailed product listings via the online searchable EPMA Members’ Directory database.
Technology Development

EPMA undertakes a key role in the co-ordination of various EU government or industry funded research and development programmes. These range from short term purely industry funded club projects to larger government supported programmes running for several years. The club projects are designed by EPMA Members to meet their needs and help to improve the competitiveness and capability of the European PM industry. Current EU projects include:

The Skills Strategy in Additive Manufacturing project aims to provide solutions capable to foster and support the growth, the innovation and competitiveness of the AM sector. A methodology for a sustainable and continuous assessment of current and future skills needs in AM through providing just in time mapping and monitoring of the AM industry technological trends, skills shortages and mismatches, policies and figures.

The Supreme Project aims at optimizing powder metallurgy processes throughout the supply chain enabling the reduction of the raw material resources while improving energy efficiency. It has a consortium of 17 partners from 8 countries, represented by 11 companies and will target 5 applications sectors. EPMA also supports the development of new standards for the industry and the outcomes of some of these technology projects have helped in the developments of ISO standards, such as ISO 5755 on PM Material Specification and the recent standard ISO 22068 on Injection Moulded Materials.

Industry Statistics

The collection and dissemination of PM industry statistics is a key service available only to EPMA Members. Contributing members receive regular updates on statistics and trends in their relevant industry sector. We also supply a review of global PM trends, including statistics collected from North America and Japan.

PM Publications

Our extensive PM catalogue is one of the most comprehensive listings in Europe. All publications are produced in English, with some titles exclusive to the EPMA. Details for placing orders online are available on the EPMA website: www.epma.com/publications

REACH

The REACH (Registration, Evaluation and Authorisation of Chemicals) legislation, will continue to be an important issue to all areas of the PM Industry. The EPMA actively works with the Brussels based organisations, including Eurometaux, as well as several other industry trade associations to provide business critical information on REACH and other environmental legislation issues. To assist with the dissemination of this information to members, EPMA coordinate special Workshops on forthcoming legislation and produce a regular email REACH newsflash.

International Relations

EPMA maintains its strong position as a lobbying organisation through links to the European Government and directorates. The production by members of ‘Vision 2025’, the European PM industry’s Roadmap, is part of the strategy to influence decision makers and politicians. We also represent the European PM industry on global issues in regular meetings with international, national associations and professional bodies.
## EPMA Membership Pricing Structure 2020

### Full Member **
Companies must be actively involved in one or more areas of powder metallurgy as listed in the EPMA Bylaws. Only Full Members have voting rights.

Annual Membership
€3660

### Full Member: Small Company Discount **
Companies who have annual PM related sales of more than €3 million but less than €10 million, are eligible for Full Member: Small Company Discount, entitling them to a 40% reduction on the Full Membership Fee.

Annual Membership
€2240

### Full Member: Micro and Start-up Company Discount **
Companies who have annual PM related sales of up to €3 million are eligible for Full Member: Micro and Start-up Company Discount, entitling them to a 60% reduction on the Full Membership Fee.

Annual Membership
€1464

### Affiliate Member
Membership in this category is open to manufacturing subsidiaries of Full Member holding companies in the same sector. This category also applies to PM Consultants who wish to be listed as a consultant within the EPMA Directory of Members.

Affiliate Members do not have any voting rights, but otherwise enjoy all other benefits of Full Membership.

Annual Membership
€950

### Associate Member
Open to the following organisations:
- European companies with an interest in PM, but not active in manufacturing metal powders, components or production equipment.
- Non-European companies active in the manufacture of metal powders, PM products and production equipment.
- Research establishments, scientific institutions or societies.

Associate Members do not have any voting rights, but otherwise enjoy many benefits of Membership, including participation at the Annual Meeting.

Annual Membership
€1830

### Individual Member
‘Individual Membership’ (without voting rights) is open to persons with clear professional interests in the objectives of the Association, including universities and educational institutions.

Applications from individuals employed by organisations which are eligible for ‘Full’, ‘Affiliate’ or ‘Associate’ membership cannot be accepted as ‘Individual’ members unless their organisation is already a member in one of the above categories.

Annual Membership
€200

### Student Member (Junior)
‘Junior Membership’ is open to persons under 30 years of age under the same conditions as those for ‘Individual Members’, but not including a subscription to Powder Metallurgy.

Annual Membership
€100

## Design for PM: Free online training course for designers and engineers

Design for PM is a FREE e-learning training course for industrial designers and engineers. It will enable them to design superior components/products to be manufactured using the powder metallurgy (PM) production process. The online courses cover the Conventional PM, Hard Materials and Metal Injection Moulding sectors.

This online resource provides e-learning materials covering how to best design components using the PM process. Its aim is to enable designers/manufacturers of components and systems to make an informed choice about using PM materials in a wide variety of applications.

### EPMA Training and Education 2020

The EPMA recognises the importance of Training and Education, with significant effort dedicated to continuing these activities for the benefit of the future PM Industry.

**Euro PM2020 Congress & Exhibition**

Euro PM2020 Congress & Exhibition will be an all-topic powder metallurgy event covering:

- Additive Manufacturing
- Environment and Sustainability
- Functional Materials
- Hard Materials and Diamond Tools
- Hot Isostatic Pressing
- Metal Injection Moulding
- Materials and Processes for Specific Applications
- Press and Sinter

Euro PM2020 Congress & Exhibition is the leading opportunity in 2020 for the European PM industry to meet and network.

To find out more, please visit [www.europm2020.com](http://www.europm2020.com)
