Underbarrel

Company: MimEcrisa

Sector: Defence

Material: 8740

Harden to 33-37 HRc

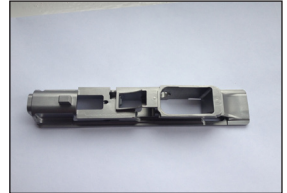

Weight: 168 grms

Main difficulty:

Flatness 0.15 mm

Avoid deformation at MIM process

Main saving: Machining operations

Cosmetic Surgeon Device

Company: MimEcrisa

Sector: Medical

Material: 316 L density > 7.85 g/cc

Weight: 69 grms

Main difficulty: Mould construction

Ejection from the mould

Main saving: Welding and machining Operations
